Aurora Grid Renewables, Inc. - Q2 2026 Financial Brief

Aurora Grid Renewables, Inc. develops utility-scale solar and battery-storage projects.

For Q2 2026, revenue was $486 million, compared with $405 million in Q2 2025. Operating income was $72 million versus $54 million in the prior-year quarter. Net income was $49 million versus $37 million.

Solar project revenue was $302 million and battery-storage revenue was $184 million. Battery-storage revenue increased 31% year over year, while solar project revenue increased 12%.

The company reported total operating expenses of $414 million, including $61 million of research and development and $38 million of selling, general and administrative expense.

Cash and cash equivalents at June 30, 2026 were $620 million. Total debt was $1.24 billion. Capital expenditures during the quarter were $96 million.

Management expects full-year 2026 revenue of approximately $1.95 billion to $2.05 billion and adjusted EBITDA of $310 million to $340 million.

The company identified interconnection delays, battery-cell pricing, project permitting, and interest-rate volatility as principal risks.
